Mobile Learning & Knowledge Solutions

More and more individuals working in social care and early years are using technology and e-learning to support their work and develop their knowledge. For employers, these are useful tools for delivering training and enhancing workplace learning in a flexible, efficient way.

NISCC have developed a number of mobile apps to support workforce learning and development. The development of these apps is part of our strategy to develop innovative ways of delivering information and engaging with our audiences through greater use of new technology and media.

All the apps are free of charge and are available for iPhone and Android mobile devices as well as tablets. Once they have been downloaded, the apps can be referred to when they are needed, making it easy to access while in the office or working out and about.
